The right capability for
every school need

Axis' unique Lightfinder technology
Outstanding performance in difficult lighting conditions

> High light sensitivity with excellent image quality and noise reduction
> Color images in environments as low as 0.5 lux
> Black and white images in environments as low as 0.08 lux

Axis' Corridor Format
Gives you the right perspective

> Ideal for situations where a more vertical view is needed
> Maximizes image quality using a 9:16 aspect ratio
> Eliminates bandwidth and storage waste
> Ideal for hallways and corridors

Vandal and tampering protection
Protection where you need it

> Stronger, more protective metal housings
> Curved housing prevents efforts to block the camera's field of view
> Flush installation makes cameras less vulnerable

Active tampering alarm
A new level of intelligent video
> Automatically detects redirections, block, and covering and alerts the operator of attempts to disrupt normal operation
> Sends an alarm if camera is defocused or broken
> Options with alarm function if camera is displaced more than the specified angle

HDTV network cameras
When every detail matters
> Higher resolution, more detail, better possibilities for identification
> Same number of cameras, more coverage
> 16:9 aspect ratio for more efficient and actionable surveillance

Auto-tracking
> Increased effectiveness of unmanned video surveillance
> Enables PTZ cameras to automatically follow an object moving in a scene
> Reduces the amount of cameras and operators needed for a large area
> Cuts cost and increases image usability
