

Cost-efficient and future-proof of **AXIS Video Surveillance Solutions**

Are you looking for a way to improve the overall safety and security at your hospital or healthcare facility? And at the same time enable high-quality patient monitoring to increase the everyday efficiency?

With a network video solution from Axis, you get a cost-efficient tool to:

- Effectively monitor critical areas such as emergency rooms, psychiatry departments and restricted areas
- Prevent break-ins and dishonest insurance claims
- Quickly evaluate incidents and take appropriate actions
- Create a scalable and future-proof surveillance platform

Well-proven in medical environments

Axis' leading range of network video products has been successfully implemented at healthcare facilities around the world. They deliver high-quality images that reduce investigation times and provide valid proof in case of incidents. Further capabilities include:

- Remote monitoring with access to live and recorded video from any authorized computer
- HDTV video images with exceptional level of detail
- Automatic alarms in case of camera tampering and trespassing

Leverage your existing CCTV investments

Several hospitals have selected Axis video encoders for a seamless transition to IP-based surveillance. This has enabled them to protect their current investments and yet benefit from the many advantages of network video technology. As a result, they now have a cost-efficient and scalable system that facilitates all handling and investigations of their recorded video.
